ABSTRACT

CHILDREN'S SOCIAL WELFARE

ABSTRACT:

The purpose of this Children's Social Welfare is to provide child protection, family service and children development. The Child welfare system is a group of services designed to promote the well-being of children by ensuring safety, achieving permanency, and strengthening families.

INTRODUCTION:

Children have been central to the development of welfare programs in the United States. Indeed, sympathy for poor and abandoned children was crucial. Substance abuse, inadequate housing, health needs, parental incarceration, and racial discrimination are just some of the issues that challenge the capacity of the child welfare system and its staff to provide adequate services to the families and children it serves. The goal of child welfare is to promote the well-being, permanency, and safety of children and families, by helping families care for their children successfully or, when that is not possible, helping children find permanency with kin or adoptive families. Child welfare services are in a position to play a crucial role in preventing behaviour problems among maltreated children, as well as intervening to facilitate service delivery for children who exhibit behavioural difficulties. Preventing the maltreatment of children so that they don't need to enter the child welfare system. Encouraging family preservation efforts that keep children in the system with their parents. Strengthening care by relatives—kinship care—to improve the experience of children already in the system. Child welfare systems typically take the following actions:

- Providing temporary safe shelter.
- Providing Education to the children.
- Seek to return children to their families when safety has improved.

FEATURES:

- Family like care.
- Advocacy and child safeguarding.
- Education.
- Children's Participation.
- Youth Engagement as Volunteers
- Kinship care

SOFTWARE REQUIREMENTS:

- | | | |
|----------------|---|------------------------------|
| • Languages | : | Python ,HTML,CSS,Java Script |
| • Technologies | : | Django |
| • Web server | : | Manage.py/XAMPP. |
| • Data base | : | My SQL |

- Browsers : Chrome.
- Operating System : Windows 10

HARDWARE REQUIREMENTS:

- Hard disk : 250 GB and Above
- RAM : 4 GB
- Processor : Intel
